

ISO 42001 GAP ANALYSIS

CNS
at Six Degrees

Gain ISO 42001 certification and demonstrate the security of your AI deployments

AI presents huge opportunities to businesses – but AI deployments also increase your attack surface and introduce risk. If your business has AI deployments, are you ready to demonstrate to clients and partners that you manage AI risk through an AI management system?

Six Degrees' ISO 42001 Gap Analysis is a structured, comprehensive and methodical review of your readiness to implement an AI management system. ISO 42001 is the international standard for establishing and implementing an AI management system; by certifying your business against ISO 42001, you gain peace of mind that you are basing your AI management system on industry best practices, while reassuring your clients and partners that you take AI risk seriously.

Meet ISO 42001 requirements and ensure you are prepared for certification.

Reassure your clients and partners that you are safe to work with.

Leverage ISO 42001 to build a scalable AI management system.

Protect your business' reputation and improve competitive advantage.

Aligned to Your Cyber Security Challenges

"We want to protect our business' reputation while improving competitive advantage through the use of AI."

We will work with your teams to understand your AI management system, and provide practical, proportionate recommendations to align to ISO 42001.

"We think we're ready for ISO 42001 certification, but we're not confident and need expert insight."

The ISO 42001 Gap Analysis is the perfect mechanism for you to establish your readiness for ISO 42001 certification. Our consultants will guide you through each stage of the process.

"We know we need to establish an AI risk management system around more than just security, but we don't know where to start."

The ISO 42001 Gap Analysis enables you to gain peace of mind that you are basing your holistic AI management system on industry best practices.

"We need to explain to senior management what the operational and commercial benefits are of certifying against ISO 42001."

We will help non-technical senior leadership to understand AI management and how ISO 42001 certification will bring operational and commercial benefits to your business.
