

NIST CYBER SECURITY FRAMEWORK (CSF) 2.0 ASSESSMENT

CNS
at Six Degrees

Understand and enhance your business' cyber security posture

We are all operating in a hostile digital landscape – in fact, half of UK businesses reported experiencing some form of cyber security breach or attack in the last 12 months¹. Do you know your business' cyber security posture and your exposure to downtime and data breach?

Six Degrees' NIST Cyber Security Framework (CSF) 2.0 Assessment is a structured, comprehensive and methodical review of your cyber security posture. The NIST CSF 2.0 standard is widely used across UK public and private sector organisations and is a perfect way to better understand and enhance your cyber security maturity.

Understand your security efficacy at a strategic level.

Achieve effective information and cyber security risk management and governance.

Establish a systematic approach to implementing best practices at an operational level.

Comprehensively manage and mitigate information and cyber security risks.

Aligned to Your Cyber Security Challenges

"We don't understand the information and cyber security risks to our business and its assets."

We will work with your teams to understand your assets and the threats and risks associated with them, and provide practical, proportionate recommendations to further protect them.

"We know we should be considering and doing information and cyber security better, but we don't know where to start."

The NIST CSF 2.0 Assessment is the perfect mechanism for you to understand this strategically and operationally in a structured, methodical manner. Our consultants will guide you through each stage of the process.

"Senior leadership want us to tell them how secure we are, but we don't really know how to articulate it."

We will help non-technical senior leadership to understand your strengths and weakness in relation to security and tell them where to focus resource in order to improve it.

"We think we are doing security well but can't really say for sure."

The NIST CSF 2.0 Assessment has coverage across the complete spectrum of security controls and provides specialist, independent assurance of your security posture.
